DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Rath et al., U.S. Patent No. 6,649,695 (hereinafter "Rath;" published Feb. 15, 2001 as PCT Pub. No. WO01/10969). See Rath, Abstract; col. 2, line 9 through col. 3, line 35.

3. Claims 1-16 is rejected under 35 U.S.C. 102(b) as being anticipated by Tawada et al., JP 2002-255596 (hereinafter "Tawada"). See Tawada, [0018] to [0022].

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

6. Claims 2-16 rejected under 35 U.S.C. 103(a) as being unpatentable over Rath in view of Tawada et al., JP 2002-255596 (hereinafter "Tawada"). Rath differ from the present invention in that the present invention requires a thermoplastic resin, tackifiers and plasticizers. Tawada teaches in analogous art a block copolymer (isobutylene/aromatic vinyl) which is blended

Art Unit: 1796

with another polymer along with a tackifier and plasticizers. See Tawada, [0018] to [0022]. In recently decided KSR Int'l Co. v. Teleflex, Inc., the Supreme Court unanimously stated "the combination of familiar elements according to known methods is likely to be obvious when it does no more than yield predictable result." In view of Tawada, one having an ordinary skill in the art would be motivated to modify Rath by using blend with a tackifier and plasticizer. Such modification would be obvious because one would expect that the use of sealant as taught by Rath would be similarly useful and applicable to the gummy spacer taught in Tawada.
